### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The closest prior art of record is to USPN 6,466,365 to Maier et al. and USPN 6,465,092 to Takushima et al. Maier teaches a film coated optical element comprising a silica doped fluorine film. Takushima teaches it is known to apply  $\text{MgF}_2$  or fluorine-containing resins as antireflection coatings to films over glass, but does not teach a film of silica doped fluorine. Thus the novelty of the invention is the order of the film where a layer of material selected from the group consisting of  $\text{MgF}_2$ ,  $\text{LiF}$ , and  $\text{Na}_3\text{AlF}_6$  is adjacent to a silica doped fluorine film.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
